University of Florida  
College of Public Health & Health Professions Syllabus  
Course Number CLP 7934: Pediatric Psychology (3 credit hours)  
Fall: 2017  
Delivery Format: On-Campus

Instructor Name: David Janicke, Ph.D.  
Room Number: HPNP 3170  
Day/Time: Tuesday, 9:00 to 11:30am  
Phone Number: (352) 273-6046  
Email Address: djanicke@phhp.ufl.edu  
Office Hours: E-mail instructor to schedule a meeting  
Preferred Course Communications: E-mail or office phone

Prerequisites  
Second year or higher graduate student in Clinical and Health Psychology

PURPOSE AND OUTCOME

Course Overview  
The learning objectives for this class include: (1) Increasing students’ knowledge in a broad range of pediatric/child health psychology topics; (2) Delineating the types of psychological services provided by pediatric psychologists; (3) Promoting a critical understanding of the pediatric psychology literature; (4) Understand the competencies expected of pediatric psychologists at different levels of professional development; (5) Fostering an awareness of the critical issues (both research and clinical) in the field of pediatric psychology; and (6) increasing awareness of research methods and design commonly utilized in pediatric psychology settings.

Relation to Program Outcomes  
This course fulfills requirements for additional child/pediatric area of concentration courses (Department of Clinical and Health Psychology PhD program).

Instructional Methods  
The course format will include didactics, class discussion, and student class presentations. Additional readings may be assigned throughout the semester. Students should come to each class prepared and ready to contribute to class discussion, as this class will focus heavily on interactive participation. Therefore, advanced preparation (reading articles, writing questions) and class participation of students is expected and essential. Attendance and active participation in class sessions is required.

**Student Presentations** |
**Course Materials and Technology**

Class readings will be available in PDF form on the student share drive. However, many of the readings will be taken from the following book. Thus, it is recommended that students who plan to build a career in pediatric psychology consider purchasing this text from on-line bookstores (e.g., Amazon.com).

*All readings for the course are saved in pdf format on the student share drive:

```
"S:\CP-Student\2017 – Ped Psych Class"
```

*Readings highlighted in gray in the syllabus are optional for the specific class period, but will also be included in the readings folders.
ACADEMIC REQUIREMENTS AND GRADING

Your grade will be based on submission of weekly discussion questions, overall class participation, and a class presentation that includes a toolkit. Details for each course requirement are provided below.

For greater detail on the meaning of letter grades and university policies related to them, see the Registrar’s Grade Policy regulations at:
http://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

WEEKLY CONTENT QUESTIONS:
Prior to each class, students are expected to submit one thought-provoking content question based on the assigned readings to promote class discussion. Please submit your questions to Dr. Janicke by 6am the morning of class. Content questions should be sent via e-mail (djanicke@phhp.ufl.edu). Each question is worth 2 points. Points for each content question are assigned using the following scale:

2  Good, though provoking question; clear that material was read adequately
1  Superficial question; unclear whether material was read thoroughly
0  No questions submitted, irrelevant content, or clear lack of effort

There will be 15 classes (not counting week 1) to submit questions; this includes submitting a question on presentation days. You will also be assigned one article to read for each presentation. I will drop your lowest score; alternatively, you can choose not to submit a question for one class period. Thus, 14 scores count toward your final course grade. This is worth up to 28 points of your total grade.

I encourage you to complete readings and submit a question each week, even if you have to miss a class (e.g., ill or out of town).

WEEKLY PARTICIPATION IN CLASS DISCUSSIONS
In order to maximize your learning in this course, it will be essential that you not only read the assigned material, but also understand and apply it. Thus you will be graded on your participation in class discussions throughout the semester. This is worth up to 32 points toward your overall course grade.

In addition, as part of your class participation grade, you will be required to sign up for one article review during the course of the semester. The three class periods for these are Sept 12, Sept 19, and Oct 17. Towards the bottom of the syllabus I have listed 4-5 articles for each class. You will need to sign up to review
one of these articles for one of these classes. Then during class, I want you to give a 5-7 minute review on what you see as the key points of the article. These articles are NOT part of the regular reading list, so your classmates will not be reading these articles.

PRESENTATION AND TOOLKIT

A large portion of your grade will be based on a presentation you will give in class focusing on an illness condition or other relevant topic in pediatric psychology. This will be considered your “final exam.” You will choose a topic/illness condition from a list of possibilities I have provided below. If you have an alternative idea outside the list provided, you can discuss with me. Do NOT select a disorder in your area of research or clinical [sub] specialty. I want you to choose a topic that is of interest to you and something that will extend your knowledge in an area, rather than choosing a topic that is based on the ease with which you can complete it. Your topic choices should be submitted to me no later than during class on Tuesday, Sept 12th. The sooner you let me know, the better as it is “first come, first serve”, if you will.

Possible Topics Include:

Burns, Cancer, Cystic Fibrosis, Disorders/Differences of Sexual Development, Elimination Disorders (enuresis and encopresis), Epilepsy and Seizures Disorders, Food Allergies, Inflammatory Bowel Disease, Juvenile Arthritis, Medical Traumatic Stress, Obesity, Organ transplantation, Type 1 diabetes, Type 2 Diabetes, Sickle Cell, Sleep Issues, Spina Bifida,

Presentation: Your power point presentation should last between 30 and 35 minutes. You should then be prepared for questions, so overall each presentation with questions will last about 45 minutes. There will be no more than two per class.

Some points to help organize your presentation:

[1] Include the information necessary to describe the disease or problem and needed for us to understand the disorder; include prevalence, mortality and morbidity information. This includes references to the medical definitions of the problem and how it is [medically] diagnosed (main pathology, risk factors, symptoms, course) and how the patient might present to the health psychologist upon referral. What medications, surgical, or rehabilitation approaches are used to treat this problem; what are the “side effects,” and what does the health psychologist need to be aware of.

[2] You should also discuss the important psychosocial concerns, and the most frequent issues of involvement for pediatric psychologist working with youth with this condition. Include the assessment[s] of the psychosocial issues related to it and the psychological treatments used with patients with that diagnosis or problem. Where evidence-based approaches exist in the psychological literature for both assessment and treatment, please highlight those and/or detail what is missing in the literature or where improvements could occur both in the research and clinical areas.

[3] Include in your presentation information about services for patients with your chosen disease/disorder within our own UF Health Science Center [if such services exist or why they do not]. This should include finding the relevant department, service, or clinic here at Shands & the HSC and determining, if any, health psychological services are available for their patients. Discuss how pediatric psychologists are involved with this clinics/serve patients. If not available here, how could they be involved.

In addition, you will present a toolkit for the illness that you will develop and distribute to your classmates.

Disease Topic Toolkits: A part of your presentation you will develop and present a “clinical toolkit” of materials (handouts, websites, CD, etc) that can be used for assessment and treatment related to your specific illness as well as other critical issues related to the illness. As noted previously, each topic pertains to a specific illness and a common psychosocial issue/problem related to that illness. Many of the possible
assessment and treatment strategies, as well as critical “psychosocial issues/problems” may cut across illnesses. Therefore, feel free to pull in relevant information as it relates to other illness groups.

You will distribute via placing it in our class share drive folder (remind me to discuss access for students now within my department). In general, the clinical toolkit should be “user friendly” in that your classmates will be able to utilize and apply the information to cases (perhaps with the same health concern or others) seen in their clinical work in the years ahead. Be creative and comprehensive, thinking of what kind of resources you would appreciate having at your disposal should you see a similar case (e.g., bibliotherapy suggestions for families, web site information, copies of non-copyrighted assessment measures, descriptive list of copyrighted and non-copyrighted rating scales, sample monitoring forms, audiotapes or scripts of treatment procedures, strategies for maximizing the effect of a treatment approach, worksheets, etc). It also must include an annotated bibliography for key references useful to a clinician.

**We can discuss as a class how to best distribute your toolkit materials to your classmates.

---

**Policy Related to Required Class Attendance**

Attendance is expected as a part of the student’s professional training. Students are expected to arrive for class on time and to remain for the full class period. Students needing to miss class or arrive late/leave early should make prior arrangements with the instructor via e-mail. Please note all faculty are bound by the UF policy for excused absences. For information regarding the UF Attendance Policy see the Registrar website for additional details: https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx

---

**STUDENT EXPECTATIONS, ROLES, AND OPPORTUNITIES FOR INPUT**

**Expectations Regarding Course Behavior**

Please refrain from using I-pods, cell phones or any other electronic devices during class as it is distracting and inconsiderate of other students and the instructor. Please leave cell phones in carrying case or outside of class; we do not want students utilizing cell phones during class unless there is an urgent issue. Laptop use is acceptable for note taking or presenting; please do not use laptop to search the internet or respond to e-mails during class. No recording of the class will be allowed due to the confidential nature of information to be discussed in the course. It is expected that you will actively participate in discussion during class. Active class participation will enhance learning during the course and aid in meeting the course objective regarding learning how to provide constructive feedback to other students regarding their therapy cases.

Please do not arrive late to class or disrupt the class as it is distracting and inconsiderate of other students and the instructor.

To the extent permitted by facility rules and restrictions, you may bring food and/or beverages to class as long as it does not interfere with your ability to work and/or participate in class and as long as it does not interfere with or your classmates’ ability to work and participate in class. You will be expected to clean-up after yourself and dispose of all trash before leaving the classroom.

**Inclusive Learning Environment**

Public health and health professions are based on the belief in human dignity and on respect for the individual. As we share our personal beliefs inside or outside of the classroom, it is always with the understanding that we value and respect diversity of background, experience, and opinion, where every individual feels valued. We believe in, and promote, openness and tolerance of differences in ethnicity and culture, and we respect differing personal, spiritual, religious and political values. We further believe that celebrating such diversity enriches the quality of the educational experiences we provide our students and enhances our own personal and professional relationships. We embrace The University of Florida’s Non-Discrimination Policy, which reads, “The University shall actively promote equal opportunity policies and practices conforming to laws against discrimination. The University is committed to non-discrimination with respect to race, creed, color, religion, age, disability, sex, sexual orientation, gender identity and expression, marital status, national origin, political opinions or affiliations, genetic information and veteran status as
protected under the Vietnam Era Veterans’ Readjustment Assistance Act.” If you have questions or concerns about your rights and responsibilities for inclusive learning environment, please see your instructor or refer to the Office of Multicultural & Diversity Affairs website:  www.multicultural.ufl.edu

Communication Guidelines
It is expected that e-mail communications and behavior with course faculty and other students enrolled in the course will be professional and respectful. Per the Clinical and Health Psychology graduate student handbook, it is never appropriate to post information about patients or therapy sessions on the internet in any fashion, even if identifying information is not included. Likewise, it is not appropriate to post information from class discussion regarding patients or students in the course on the internet in any fashion. It is also not appropriate to make negative statements regarding a student’s clinical skills to other students in the course or in the graduate program. Concerns about another student's clinical skills should be directed to one of the course faculty.

Academic Integrity
Students are expected to act in accordance with the University of Florida policy on academic integrity. As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge:

“We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.”

You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied:

“On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For additional information regarding Academic Integrity, please see Student Conduct and Honor Code or the Graduate Student Website for additional details: https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/ http://gradschool.ufl.edu/students/introduction.html

Please remember cheating, lying, misrepresentation, or plagiarism in any form is unacceptable and inexcusable behavior.

Online Faculty Course Evaluation Process
Course evaluations will help to inform improvements and future modifications to the course, and are also used as part of faculty tenure and promotion packets (as such, they may have a direct influence on faculty tenure and promotion). Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at https://evaluations.ufl.edu. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results/.

SUPPORT SERVICES

Accommodations for Students with Disabilities
If you require classroom accommodation because of a disability, you must register with the Dean of Students Office http://www.dso.ufl.edu within the first week of class. The Dean of Students Office will provide documentation of accommodations to you, which you must then give to me as the instructor of the course to receive accommodations. Please make sure you provide this letter to me by the end of the second week of the course. The College is committed to providing reasonable accommodations to assist students in their coursework.

Counseling and Student Health
Students sometimes experience stress from academic expectations and/or personal and interpersonal issues that may interfere with their academic performance. If you find yourself facing issues that have the potential to or are already negatively affecting your coursework, you are encouraged to talk with an instructor and/or seek help through University resources available to you.
- The Counseling and Wellness Center 352-392-1575 offers a variety of support services such as psychological assessment and intervention and assistance for math and test anxiety. Visit their web site for more information: http://www.counseling.ufl.edu. Online and in person assistance is available.
- You Matter We Care website: http://www.umatter.ufl.edu/. If you are feeling overwhelmed or stressed, you can reach out for help through the You Matter We Care website, which is staffed by Dean of Students and Counseling Center personnel.
- The Student Health Care Center at Shands is a satellite clinic of the main Student Health Care Center located on Fletcher Drive on campus. Student Health at Shands offers a variety of clinical services. The clinic is located on the second floor of the Dental Tower in the Health Science Center. For more information, contact the clinic at 392-0627 or check out the website at: https://shcc.ufl.edu/
- Crisis intervention is always available 24/7 from:
  Alachua County Crisis Center: (352) 264-6789
  http://www.alachuacounty.us/DEPTS/CSS/CRISISCENTER/Pages/CrisisCenter.aspx

Do not wait until you reach a crisis to come in and talk with us. We have helped many students through stressful situations impacting their academic performance. You are not alone so do not be afraid to ask for assistance.
